

## Lesson 1: Making Sense

**Initial models:** Draw and label a model to help you explain your thoughts on this question: *Why would a sound coming from one thing make another thing far away move?* Show a zoomed-in view of what is happening at locations a, b, and c.

a. What is happening at the spot where the sound is coming from?

b. What is happening between the truck and the building window?

c. What is happening at the window to make the window move?
