

Mrs. Middlestead is calling all 6th, 7th and 8th grade students to participate in a STEAM poster competition that demonstrates their knowledge of the Scientific Method and the Engineering Design Process. You will be working with your 10:00 partner on this. Your poster must:

- Include the scientific method and the engineering design process in one cohesive diagram.
- Be no smaller than 24" x 36" or larger than 27" x 39" (standard poster sizes).
- Have brief and to the point word descriptions. Font or lettering size should allow your poster to be read from four feet away.
- Separately (You will turn these in, not attach them to your poster) include two articles (printed), annotated to indicate the "steps" of the process as they correspond to your poster (one for engineering and one for scientific method).
- The names of the students must be written/printed on the back of the poster.

All entries will receive test grade based on the rubric given. This is our Unit 1, final project assessment.

Entries must be submitted, complete, by Friday, October 6th. Any entry that is late, incomplete or does not comply with the requirements will not be judged.

Who are the judges you ask? Well, in addition to the other classes, we will ask all of the middle school teachers to judge them as well. Good Luck!!
